Gender Equality Plan in STEM

Université libre de Bruxelles

GEP Short version (September 2021)

This project has received funding from the European Union’s Horizon 2020 Research and Innovation programme under Grant Agreement No 873134
This document presents the Gender Equality Plan (GEP) that the Université libre de Bruxelles (ULB) has approved for its two STEM faculties:

- Faculty of Sciences
- Brussels School of Engineering

within the framework of the EU-funded CALIPER project.

CALIPER is a Horizon 2020 European project that aims at **enhancing the gender balance in STEM fields**, thereby

- contributing to the European Research Area (ERA) priorities on gender equality, and
- stimulating **dialogue and collaboration** between academia, public authorities, professionals, and industry players to tackle gender inequalities.

**CALIPER Consortium at a glance**
- 7 research performing organizations (RPOs)
- 2 research funding organizations (RFOs)
- 2 SMEs
- 1 Professional association
- 10 countries
A GEP is a set of actions aimed at:

- identifying gender inequalities,
- implementing innovative strategies to correct them, and
- setting targets and monitoring progress via indicators.

The present GEP seeks to promote gender equality in STEM fields, thus contributing to both scientific excellence and the core values of ULB, a committed university that defends the principle of free inquiry, refuses all arguments of authority, and promotes democracy, freedom, equality, and social justice.
Opportunities and benefits of **gender equality** for universities and research organizations

Gender equality...

- fosters the attraction and retention of talents
- leads to economic benefits
- increases excellence in research quality
- creates better work environments
- is leverage for organizational change
- is a matter of fairness, democracy and credibility

Groups involved in GEP design

4 groups with members of ULB & the R&I ecosystem

CALIPER Team
Project management & GEP drafting

Steering Committee
GEP consultative & decision-making role

Working Group
Gender assessment

R&I Hub
Consultative role and design of collaborative actions

CALIPER team members +
- Michel Verstraeten, Vice-rector for gender & diversity
- Olivier Markowitch, Dean of the Faculty of Sciences
- Frédéric Robert, Dean of Brussels Schools of Engineering
- Laurence Rosier, Advisor to the University Authorities for gender policy
- Christine Decaestecker, Karine van Doninck, Dimitri Leemans & Jean-Christophe Leloup, STEM faculties professors and gender contact persons
- Daniele Carati, Research department’s director
- Monique Tavernier, University’s secretary
- Isabelle Mazzara, University’s director
- David Paternotte & Barbara Truffin, Gender research structure (STRIGES) directors

CALIPER team members +
- Barbara Clerbaux, Dimitri Leemans, Nathalie Gypens, STEM professors
- Jennifer Watchi, STEM PhD researcher

Laurent Licata, Professor, Project academic leader
Patricia Mélotte, PhD, Gender & diversity officer
Sara Aguirre, PhD, Researcher and project manager
Current composition as of September 2021. Other organizations/institutions may be added in the future.
Identification of situations to improve across different areas

- Desk research
- Collection of indicators
- Interviews and focus groups

Identification of possible strategies, courses of action & collaborations

- 4 thematic workshops with 42 ULB members
- 3 workshops with external stakeholders (R&I Hub)

Selection of the strategy, priorities and courses of action

- 1 meeting with STEM Deans + VR for gender & diversity
- 1 meeting with consultative WG

Definition of actions (objectives, activities, resources, etc.)

- 12 meetings with 18 key ULB members (high & middle management)
- 1 dialogue with R&I Hub
- 1 meeting with consultative WG
- Drafting of GEP
- Validation by consultative WG

Approval of GEP by:
- STEM faculty councils
- ULB’s academic council
- Signature by Rector, Vice-rector and STEM Deans

Approval & signature of GEP

89 people consulted
Gender Equality Strategy and Key Priority Areas
As an RPO comprising of different faculties and disciplines, the **strategy** that ULB has adopted for its GEP is twofold:

1) it focuses on **STEM-specific situations** to improve, and
2) it acts on **common transversal problems** that will be mainly addressed at the STEM faculty level. These pilot experiences will be monitored and shared with the entire University.

**GEP**

20 measures in 7 areas

- Harassment: 2 measures
- Human Resources: 4 measures
- Communication: 3 measures
- Students: 3 measures
- Teaching: 2 measures
- Research: 3 measures
- Governance: 3 measures

**Intersectionality:**

**the GEP adopts a gender+ strategy**

- **Gender** is the main contemplated type of inequality, but
- its **interaction with other sources of inequality** is taken into account in the design and implementation of the measures.

2 years are foreseen for the implementation of the GEP

A **formative evaluation** between the two

To adjust the plan during its implementation

A **summative evaluation** at the end of the implementation - Results will be presented in a final conference

The GEP in STEM aims at **complementing** ULB’s already existent policy on gender and diversity
Key priority areas and interconnected challenges
**Human resources, students, and governance**

1. ON AVERAGE, THE PROPORTION OF WOMEN IN STEM ACADEMIA IS MUCH LOWER THAN THE PROPORTION OF MEN
   
   This makes it difficult, in turn, to attain gender-balanced participation in STEM decision-making bodies and commissions

2. ON AVERAGE, THE PROPORTION OF FEMALE STUDENTS IN STEM FACULTIES IS MUCH LOWER THAN THE PROPORTION OF MALE STUDENTS
   
   Over time, this has an impact on:
   - the low proportion of female post-doctoral researchers, a key transition period in the academic career
   - the low proportion of female applications received for STEM academic vacancies

   Mutual influence: the shortage of female role models may discourage young girls from pursuing STEM studies

3. GOVERNANCE
   
   Key: gender-balanced participation in decision-making
   
   The institutionalization of gender equality principles at the faculty level and the establishment of indicators for its monitoring will guarantee the sustainability of the GEP and its long-term impacts

4. OTHER AREAS: RESEARCH, TEACHING, COMMUNICATION AND HARASSMENT
   
   Measures in these “secondary” domains will strategically support change in the 3 key priority areas by raising awareness, disseminating knowledge and facilitating access to services
Gender Equality Plan in STEM

Actions per area of intervention
Human Resources
To explore the feasibility of affirmative actions at the University to increase the proportion of female applications and recruitments in STEM academic positions.

### Situation

A lower proportion of women academics in STEM facilities compared to their counterparts (24% in the Faculty of sciences and 9% in the Brussels School of Engineering in 2018-2019).

### General objective

To increase the proportion of women in the STEM academic body (by increasing both the proportion of STEM female post-doctoral researchers and the proportion of STEM female scholars in the first levels of the academic body - lecturers).

### Strategies

</table>

Much lower proportion of female students than male students in STEM faculties, particularly at the undergraduate level (30% in the Faculty of sciences and 21% in the Brussels School of Engineering in 2018-2019)
Communication
**Situation**

Symbolic association of STEM studies and professions with men and masculinity still remains

---

**General objective**

To build a more inclusive image of STEM studies in the external communication of STEM faculties to encourage girls to pursue them

---

**Strategies**

- To equip administrators of STEM webpages with a range of tools to implement inclusive communication
- To use inclusive communication in STEM faculties websites
- To make visible the gender+ policy in the STEM faculties

---

**Measures**
