Top International
Managers in Engineering

The Faculty is a founding member of the T.I.M.E. network ("Top Industrial Managers for Europe") which was formed as an association in 1996 and currently includes more than 50 of the best engineering schools. We have signed double degree agreements with some partners, proof of a mutual esteem, which allow students with a high academic level to obtain, after a long stay at ULB (1.5 or 2 years), both degrees from the home university and from ULB. Their experience of another education system and the two degrees are particularly profitable for the broad international market.
